Mobile: +91-7075023119

EDUCATION

- B.Tech - (Computer Science and Engineering - Data Science)** November 2022 - June 2026
 - VNR Vignana Jyothi Institute of Engineering and Technology CGPA: 9.28
- Board of Intermediate Education** June 2020 - May 2022
 - Sri Chaitanya Junior Kalashala - Percentage: 98.3

SKILLS SUMMARY

- Languages:** Python, C++, Java, JavaScript, TypeScript
- Frameworks & Libraries:** React.js, Next.js, Node.js, LangChain
- Databases:** MySQL, MongoDB
- Tools:** Docker, GIT, Postman, Chrome DevTools
- Platforms:** AWS, Firebase, Vercel, Linux
- Soft Skills:** Team Coordination, Event Organization, Technical Communication, Deadline Management

EXPERIENCE

- Intripid** Remote
 - AI Developer Intern October 2024 - July 2025
 - Personalized Places Recommendation System:** Developed a recommendation system driven by LLMs. Google Places API, and user onboarding information to give personalized location recommendations.
 - System Optimization & AWS Integration:** Cut latency by 20s through batch processing, GroqCloud-based inference, and a RAG pipeline on MongoDB vector store. Developed and deployed an AWS Lambda integrated with SQS for processing operations taking ~30s compute.
 - Frontend Development with Next.js:** Created responsive layouts and dynamic UI flows from Figma designs with Next.js, Shadcn, Origin UI, and Tailwind CSS. Managed state for interactive components and built reusable, accessible, and scalable components to improve user experience.

PROJECTS

- Cat vs Dog Image Classification System** Python, TensorFlow, Keras, CNN
 - Machine Learning Development
 - Built CNN-based binary classifier with 3-layer architecture, batch normalization, and data pipeline for 25,000 images (80-20 split), achieving 92% accuracy.
 - Optimized TensorFlow pipeline with batching and preprocessing (224x224 resize).
- College Sports Fest Registration Portal** React.js, Firebase, Razorpay, Node.js
 - Full-stack Development
 - Developed a scalable registration platform capable of handling 1,500 users and managing ₹3.79L in payments seamlessly.
 - Implemented Firebase authentication, and asynchronous backend logic to ensure minimal latency during peak registration periods.

ACHIEVEMENTS

- Secured 1st place at J.P. Morgan Chase's Code for Good 2024 Hackathon by leading a 5-member team to develop a functional web application that addressed real-world nonprofit challenges, selected from 50,000 applicants (top 0.4%).
- Awarded second prize in a Python hackathon 2023 for developing a chatbot using GPT-3.5's API.
- Secured a rank of 2448 out of 197,320 candidates in TS EAMCET.

VOLUNTEER EXPERIENCE

- VJ Data Questers** March 2024 - Present
 - Technical Volunteer and Website Developer
 - Contribute to VJ Data Questers' mission of promoting data science by developing and maintaining the official website vjdataquesters.com and supporting the organization of workshops, lectures, and events.
 - Delivered a 2-hour hands-on Machine Learning session during the GetSetPy event, introducing participants to ML fundamentals, scikit-learn basics, and building mini Streamlit projects for practical learning.

CERTIFICATIONS

- Completed the Supervised Machine Learning course on Coursera, covering foundational algorithms and model evaluation.
- Earned a certification in Intro to Machine Learning from Kaggle, focusing on practical model building, feature engineering, and evaluation metrics.
