EDUCATION

- B.Tech - (Computer Science and Engineering - Data Science)** November 2022 - June 2026
 - VNR Vignana Jyothi Institute of Engineering and Technology CGPA: 9.24
- Board of Intermediate Education** June 2020 - May 2022
 - Sri Chaitanya Junior Kalashala - Percentage: 98.3

SKILLS SUMMARY

- Languages:** Python, C++, Java, C, JavaScript
- Frameworks:** React.js, Next.js, Node.js, LangChain, Flask, GraphQL, MongoDB, FireStore
- Tools:** Docker, GIT, Postman, Chrome DevTools
- Platforms:** AWS, Firebase, Vercel, Linux, Web, Windows, MacOS
- Soft Skills:** Team Coordination, Event Organization, Technical Communication, Deadline Management

EXPERIENCE

- Intripid** Remote
 - AI Developer Intern (Full-time) October 2024 - Present
 - Personalized Places Recommendation System:** Designed and deployed an AI-driven recommendation system using LLMs and Google Places API, generating user personas from onboarding inputs to deliver highly tailored location suggestions.
 - Latency and System Optimization:** Reduced end-to-end system latency by 20 seconds by implementing batch processing and migrating LLM inference to GroqCloud. Optimized the RAG pipeline fetching, embedding, and ranking places from MongoDB's vector store.
 - Frontend Development with Next.js:** Developed responsive frontend flows from Figma designs using Next.js, Shadcn, Origin UI, and Tailwind CSS. Built reusable, accessible UI components with a focus on performance and scalability.

PROJECTS

- College Sports Fest Registration Portal** React.js, Firebase, Razorpay, Node.js
 - Full-stack Development
 - Developed a scalable registration platform capable of handling 1,500+ concurrent users and managing ₹3.79L in payments seamlessly.
 - Implemented Firebase authentication, real-time database updates, and asynchronous backend logic to ensure minimal latency during peak registration periods.
- Codewatch - Automated Lab Integrity System** React.js, Tailwind CSS, Node.js, MongoDB
 - Full-stack Development
 - Addressed student malpractice during lab internals by creating a system that detects unauthorized tab accesses and alerts invigilators in real-time.
 - Utilized React, Node.js, MongoDB, and integrated the Judge0 API for real-time code compilation and evaluation, providing a secure and efficient examination environment.

ACHIEVEMENTS

- Secured 1st place at J.P. Morgan Chase's Code for Good 2024 Hackathon by leading a 5-member team to develop a functional web application that addressed real-world nonprofit challenges, selected from 50,000 applicants (top 0.4%).
- Awarded second prize in a Python hackathon 2023 for developing a chatbot using GPT-3.5's API.
- Secured a rank of 2448 out of 197,320 candidates in TS EAMCET.

VOLUNTEER EXPERIENCE

- VJ Data Questers** March 2024 – Present
 - Technical Volunteer and Website Developer
 - Contribute to VJ Data Questers' mission of promoting data science by developing and maintaining the official website vjdataquesters.com and supporting the organization of workshops, lectures, and events.
 - Delivered a 2-hour hands-on Machine Learning session during the GetSetPy event, introducing participants to ML fundamentals, scikit-learn basics, and building mini Streamlit projects for practical learning.

CERTIFICATIONS

- Completed the Supervised Machine Learning course on Coursera, covering foundational algorithms and model evaluation.
- Earned a certification in Intro to Machine Learning from Kaggle, focusing on practical model building, feature engineering, and evaluation metrics.
